

K-6 Science Assessments

Materials from the Oneida BOCES Science Center
to Enhance Your Curriculum

The teachers in the Oneida BOCES component districts developed a **Prioritized Science Curriculum** during the summer of 2004. These documents will help teachers in deciding where to place their emphasis on the lessons students need to learn to be successful on the **New York State Grade 4 and 8 Science Assessments**. They offer about thirty **Essential Questions** that teachers need to address within that school year. Booklets are now available. Each book is \$30.00 per copy for K-5; K-6; or 6-8.

The K-6 Science/Math Assessments are Now in Binder Form.

The K-6 Science Assessments (Form A and Form B Tests) were regionally developed by teachers for each of the Science/Math Kits using both objective and manipulative science tasks. These assessments have been revised due to changes in the Math Standards.

Science/Math Assessments (**K-6 Kit Test-Form A**): \$55.00 each

Science/Math Assessments (**K-6 Kit Test-Form B**): \$55.00 each

The Field Trip Manual **What A Trip** (revised edition) is now available. This manual is part of the Science Integration Project, which aims to increase scientific literacy. It details field trips in our region designed to build a specialized vocabulary and necessary concepts that are incorporated in your science units.

What A Trip

Oneida BOCES Components: \$15.00 each

Non-component Districts: \$20.00 each
